500px技术周报008

概览

目前APP的相册界面有两个问题：1、airdrop传过来的照片没有在最前面 2、照片在上万张的情况下容易闪退。

问题描述

代码中使用creationDate排序，如果不使用creationDate排序则是倒序，最早的在前面

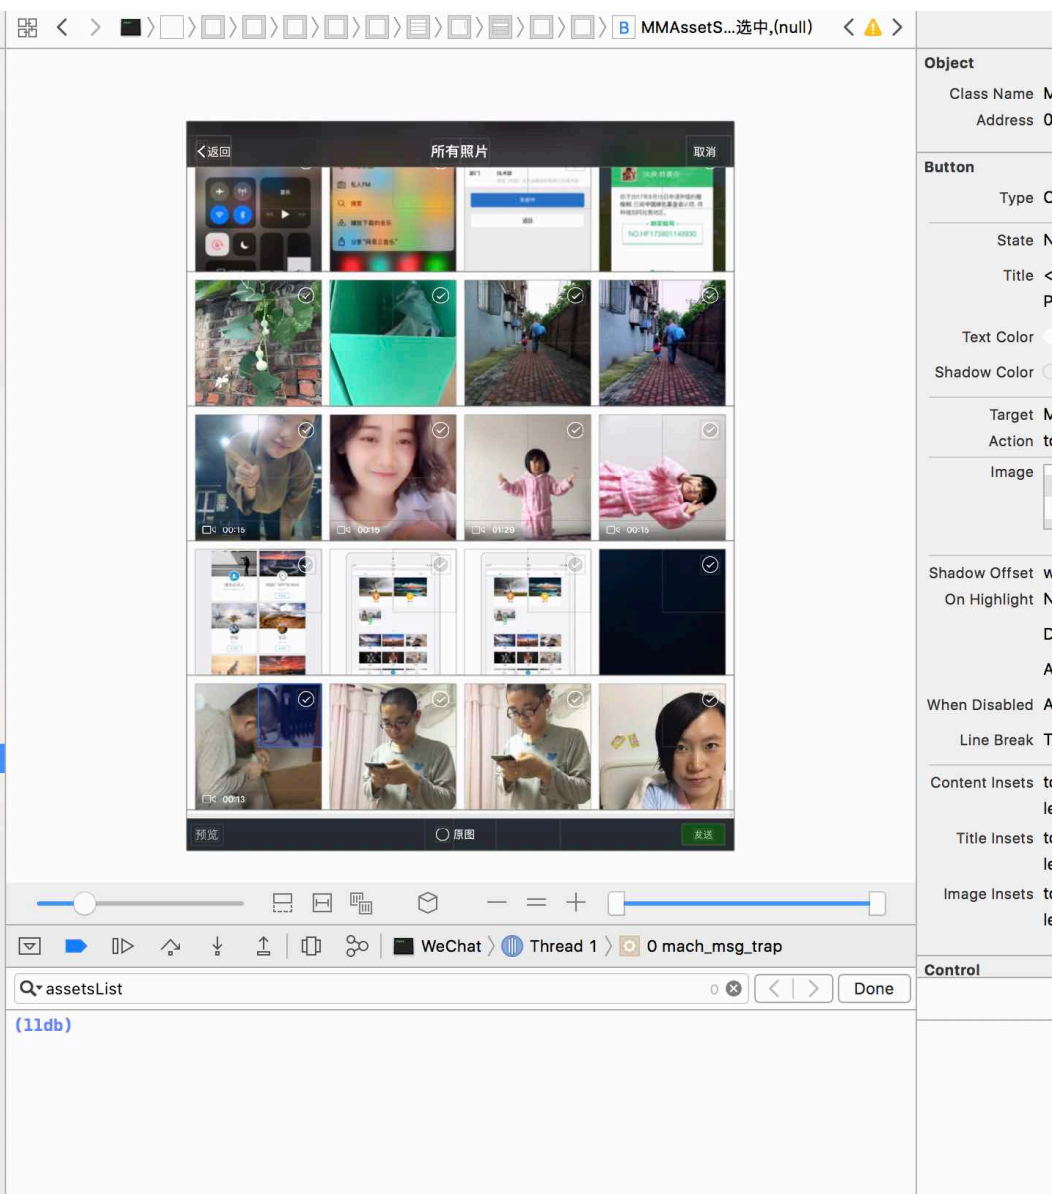

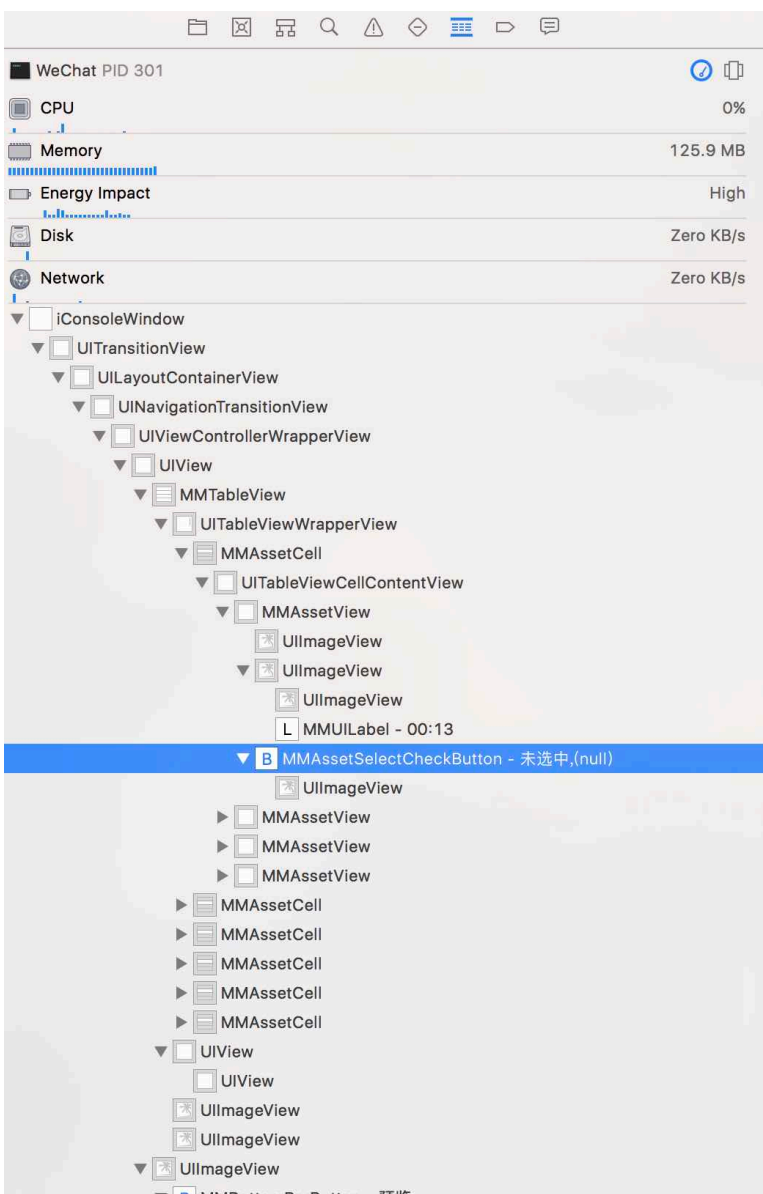

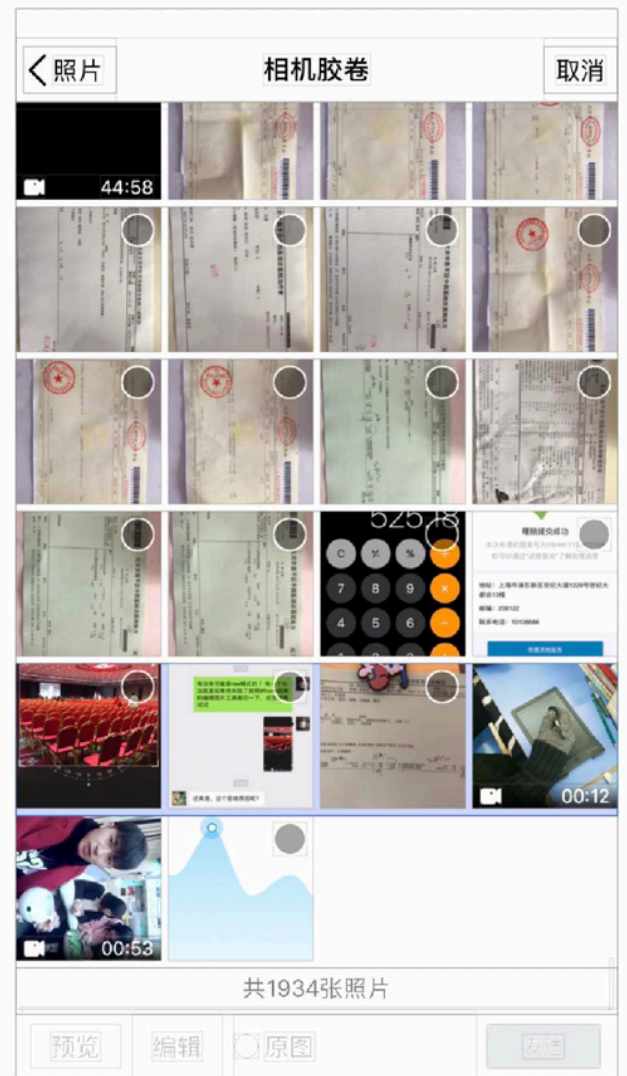

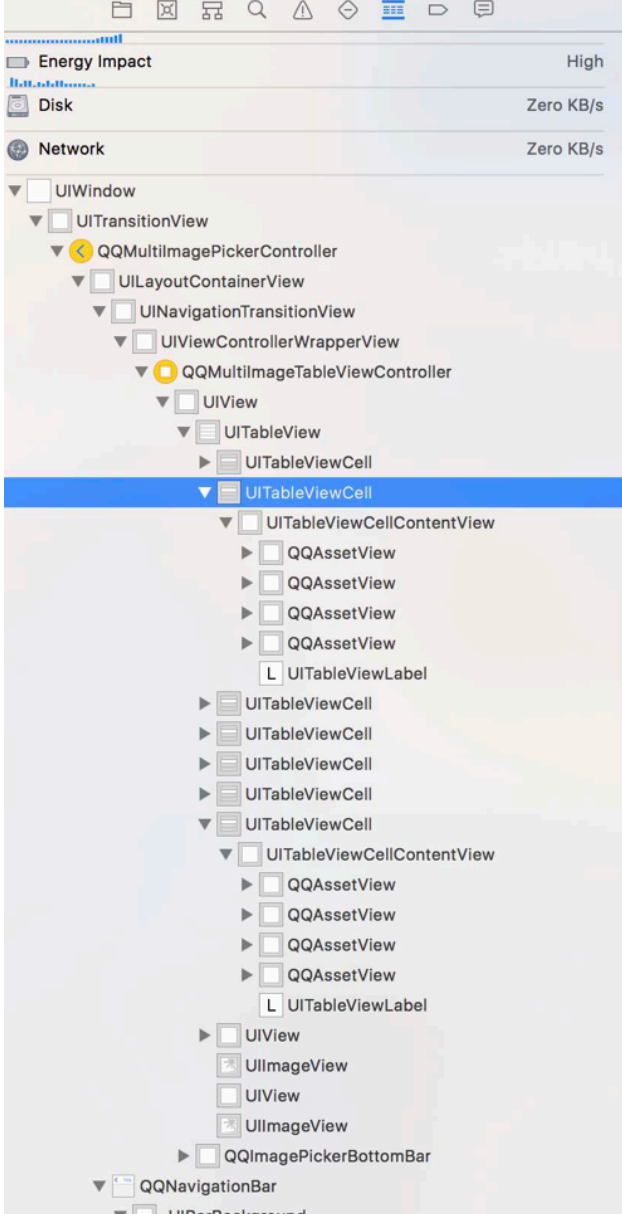

```
self.fetchOptions = [PHFetchOptions new];
self.fetchOptions.predicate = [NSPredicate predicateWithFormat
self.fetchOptions.sortDescriptors = @[[NSSortDescriptor sortDe
```

解决方案

去掉代码中使用creationDate排序

```
- (UICollectionViewCell *)collectionView:(UICollectionView *)c
    PHAsset *asset = self.assetFetchResults[self.assetFetc
}
```

那么在微信和QQ是如何来实现的？请看下图

可以看到都是使用uitableview，每个cell里有四个等比例图，默认进入到列表的最下
